Independent auditors' report

The Country Manager National Bank of Oman (SAOG), UAE Branches

Report on the financial statement

We have audited the accompanying financial statements of National Bank of Oman (SAOG), UAE Branches ("the Branches") which comprises the statement of financial position as at 31 December 2014, statement of profit or loss and other comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards and for such internal controls as management determines is necessary to enable the preparation of financial statements that are free from material misstatements, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on our judgment, including the assessment of risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of the Branches as at 31 December 2014, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

Report on other legal and regulatory requirements

We further confirm that we have obtained all information and explanations necessary for our audit and that financial statements comply, in all material respects, with the applicable requirement of Union Law no. 10 of 1980.

The attached notes 1 to 30 form part of these financial statements.

The independent auditors' report is set out on pages 1.

Notes to the financial statements for the year end 31 December 2014

1 Legal status and activities

National Bank of Oman SAOG (the "Bank" or the "Head Office") was established in the Sultanate of Oman in 1973 as a joint stock company and is engaged in retail banking, wholesale banking and investment banking services. The Bank in United Arab Emirates ("UAE") operates with two branches i.e. Abu Dhabi and Dubai (the "Branches") under a commercial bank licence granted by the UAE Central Bank. The registered office of the Branches is P O Box 3822, Abu Dhabi, UAE. Dubai Branch started its operation in December 2013.

The principal activities of the Branches are the granting of loans, advances and the provision of other commercial banking services.

The financial statements were authorised for issue by the Branches' management on ______.

2 Basis of preparation

2.1 Statement of compliance

These financial statements have been prepared on an ongoing basis in accordance with the International Financial Reporting Standards (IFRSs) (which comprises accounting standards issued by international Accounting Standards Board (IASB) as well as Interpretations issued by the International Financial Reporting Interpretations Committee (IFRIC)) and the requirements of applicable laws in the UAE.

2.2 Basis of measurement

The financial statements have been prepared on a historical cost basis except for investment securities, which are stated at fair value.

2.3 Functional and presentation currency

These financial statements have been presented using UAE Dirham ("AED"), which is the functional currency of the Branches. Except as otherwise indicated, financial information presented in AED has been rounded to the nearest thousand, except when otherwise indicated.

2.4 Significant accounting judgments and estimates

In preparing these financial statements, management has made judgments, estimates and assumptions that affect the application of the accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

Going concern

The Branches' management has made an assessment of the Branches ability to continue as a going concern and is satisfied that the Branches have the resources to continue in business for the foreseeable future. Furthermore, the management is not aware of any material uncertainties that may cast significant doubt upon the Branches ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

Notes to the financial statements for the year end 31 December 2014

2.4 Significant accounting judgments and estimates (continued)

Impairment losses on loans and advances and investment securities

Assets accounted for at amortised cost are evaluated for impairment on the basis described in Note 4(h).

The Branches reviews its individually significant loans and advances at each reporting date to assess whether an impairment loss should be recorded in the statement of profit and loss account. In particular, judgment by management is required in the estimation of the amount and timing of future cash flows when determining the impairment loss. In estimating these cash flows, the Branches make judgments about the borrower's financial situation and the net realisable value of collateral. These estimates are based on assumptions about a number of factors and actual results may differ, resulting in future changes to the allowance.

Loans and advances that have been assessed individually and found not to be impaired and all individually insignificant loans and advances are then assessed collectively, in groups of assets with similar risk characteristics, to determine whether provision should be made due to incurred loss events for which there is objective evidence but whose effects are not yet evident. The collective assessment takes account of data from the loan portfolio (such as credit quality, levels of arrears, credit utilisation, loan to collateral ratios etc.) and concentrations of risks.

In making an assessment of whether an investment is impaired, the Branches consider the following factors:

- The market's assessment of creditworthiness as reflected in the bond yields.
- The rating agencies' assessments of creditworthiness.
- The country's ability to access the capital markets for new debt issuance.
- The probability of debt being restructured, resulting in holders suffering losses through voluntary or mandatory debt forgiveness.
- The international support mechanisms in place to provide the necessary support as 'lender of last resort' to that country as well as the intention, reflected in public statements, about governments' and agencies' willingness to use those mechanisms. This includes an assessment of the depth of those mechanisms and, irrespective of the political intent, whether there is the capacity to fulfill the required criteria.

Fair value measurement principles

The fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Consequently, differences can arise between carrying values and the fair value estimates.

While these financial statements are prepared under the historical cost convention modified for measurement at fair value of available-for-sale investments, in the opinion of management, the carrying values and fair values of those financial assets and liabilities that are not carried at fair value in the financial statements are not materially different, since assets and liabilities are either short term in nature or frequently repriced.

The Branches use the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;

Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly; and

Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

At 31 December 2014 and 2013, the Branches used level 1 valuation hierarchy for its available-for-sale investments.

The Bank's financial assets and financial liabilities at amortised cost excluding held to maturity, are categorised under Level 3 in the fair value hierarchy, as there is no active market for such assets and liabilities.

Notes to the financial statements for the year end 31 December 2014

3 Changes in accounting policies

Except for the changes below, the Branches have consistently applied the accounting policies set out in note 4 to all periods presented in these financial statements.

The Branches have adopted the following new relevant amendments to standards, with a date of initial application of 1 January 2014.

(a) Offsetting Financial Assets and Financial Liabilities (Amendments to IAS 32).

As a result of the amendments to IAS 32, the Branches has changed its accounting policy for offsetting financial assets and financial liabilities. The amendments clarify when an entity currently has a legally enforceable right to set-off and when gross settlement is equivalent to net settlement.

The change did not have a material impact on the Branches' financial statements.

4 Significant accounting policies

a) Foreign currency

Transactions in foreign currencies are translated into the functional currency of the Branches at the spot exchange rates at the date of the transactions.

Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated into the functional currency at the spot exchange rate at that date. The foreign currency gain or loss on monetary items is the difference between the amortised cost in the functional currency at the beginning of the year, adjusted for effective interest and payments during the year, and the amortised cost in the foreign currency translated at the spot exchange rate at the end of the year.

Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated into the functional currency at the spot exchange rate at the date on which the fair value is determined. Non-monetary items that are measured based on historical cost in a foreign currency are translated using the spot exchange rate at the date of the transaction.

Foreign currency differences arising on translation are generally recognised in statement of profit and loss. However, foreign currency differences arising from available-for-sale equity instruments transactions are recognised in the statement of profit and loss:

b) Interest

Interest income and expense are recognised in statement of profit or loss using the effective interest method. The 'effective interest rate' is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or financial liability (or, where appropriate, a shorter period) to the carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Branches estimate future cash flows considering all contractual terms of the financial instrument, but not future credit losses.

The calculation of the effective interest rate includes all transaction costs, fees and points paid or received that are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition or issue of a financial asset or liability.

Interest income and expenses presented in the statement of profit or loss include:

- · interest on financial assets and liabilities measured at amortised cost calculated on an effective interest basis;
- interest on available for sale investment securities calculated on an effective interest basis.

4 Significant accounting policies (continued)

c) Fees and commission income

Fees and commission income – including account servicing fees, sales commission, placement fees and syndication fees – are recognised as the related services are performed. If a loan commitment is not expected to result in the draw-down of a loan, then the related loan commitment fees are recognised on a straight-line basis over the commitment period.

Other fees and commission expense relate mainly to transaction and service fees, which are expensed as the services are received.

d) Leases

Lease payments - lessee

Payments made under operating leases are recognised in the statement of profit or loss on a straight-line basis over the term of the lease. Lease incentives received are recognised as an integral part of the total lease expense, over the term of the lease.

e) Taxation

Income tax expense comprises current and deferred tax.

Taxation is provided for in accordance with the instructions of the Department of Private Affairs of His Highness Shaikh Zayed Bin Sultan Al Nahyan, dated 11 September 2003 for Abu Dhabi and tax for Dubai Branch is paid as per the Dubai tax decree. Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes

Income tax is recognised in the statement of profit or loss for the year. Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantially enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

f) Financial assets and financial liabilities

(i) Recognition

The Branches initially recognise loans and advances and deposits on the date on which they are originated. All other financial instruments (including regular-way purchases and sales of financial assets) are recognised on the trade date, which is the date on which the Branches becomes a party to the contractual provisions of the instrument.

A financial asset or financial liability is measured initially at fair value plus, for an item not at fair value through profit or loss, transaction costs that are directly attributable to its acquisition or issue.

(ii) Classification

Financial assets

The Branches uses the following categories to classify it financial instruments:

- · loans and receivables:
- · available-for-sale and

Financial liabilities

The Branches classify their financial liabilities, other than financial guarantees and loan commitments, as measured at amortised cost or fair value through profit or loss.

(iii) Derecognition

Financial assets

The Branches derecognise a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Branches neither transfer nor retain substantially all of the risks and rewards of ownership and do not retain control of the financial asset.

4 Significant accounting policies (continued)

f) Financial assets and liabilities (continued)

Derecognition (continued)

Financial assets

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset derecognised) and the sum of (i) the consideration received (including any new asset obtained less any new liability assumed) and (ii) any cumulative gain or loss that had been recognised in other comprehensive income is recognised in statement profit or loss. Any interest in transferred financial assets that qualify for derecognition that is created or retained by the Branches is recognised as a separate asset or liability.

When the Branches have transferred their rights to receive cash flows from an asset or has entered into a pass-through arrangement, and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Branches continuing involvement in the asset. In that case, the Branches also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Branch has retained. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Branches could be required to repay.

Financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in profit or loss for the year.

The Branches derocognise a financial liability when its contractual obligation are discharged or cancelled, or expires.

(iv) Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Branches have a legal right to set off the amounts and intend either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted under IFRS, or for gains and losses arising from a group of similar transactions.

(v) Amortised cost measurement

The 'amortised cost' of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment.

(vi) Fair value measurement

Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the branches have access at that date. The fair value of liability reflects its non performance risk.

When available, the Branches measure the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

If there is no quoted price in an active market, then the Branches use valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

4 Significant accounting policies (continued)

(vi) Fair value measurement (continued)

The best evidence of the fair value of a financial instrument at initial recognition is normally the transaction price — i.e. the fair value of the consideration given or received. If the Branches determine that the fair value at initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique that uses only data from observable markets, then the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value at initial recognition and the transaction price. Subsequently, that difference is recognised in statement of profit or loss on an appropriate basis over the life of the instrument but no later than when the valuation is wholly supported by observable market data or the transaction is closed out.

Portfolios of financial assets and financial liabilities that are exposed to market risk and credit risk that are managed by the Branches on the basis of the net exposure to either market or credit risk are measured on the basis of a price that would be received to sell a net long position (or paid to transfer a net short position) for a particular risk exposure. Those portfolio-level adjustments are allocated to the individual assets and liabilities on the basis of the relative risk adjustment of each of the individual instruments in the portfolio.

If an asset or a liability measured at fair value has a bid price and an ask price, then the Branches measure assets and long positions at a bid price and liabilities and short positions at an ask price.

The fair value of a demand deposit is not less than the amount payable on demand, discounted from the first date on which the amount could be required to be paid.

The Branches recognise transfers between levels of the fair value hierarchy as of the end of the reporting period during which the change has occurred.

4 Significant accounting policies (continued)

(vii) Identification and measurement of impairment

At each reporting date, the Branches assess whether there is objective evidence that financial assets not carried at fair value through profit or loss are impaired. A financial asset or a group of financial assets is impaired when objective evidence demonstrates that a loss event has occurred after the initial recognition of the asset(s) and that the loss event has an impact on the future cash flows of the asset(s) that can be estimated reliably.

Objective evidence that financial assets are impaired includes:

- significant financial difficulty of the borrower or issuer;
- · default or delinquency by a borrower;
- the restructuring of a loan or advance by the Branches on terms that the Branches would not consider otherwise;
- indications that a borrower or issuer will enter bankruptcy;
- observable data relating to a group of assets such as adverse changes in the payment status of borrowers or issuers in the group, or economic conditions that correlate with defaults in the group.

The Branches consider evidence of impairment for financial asset held at amotised cost at both a specific asset and a collective level. All individually significant financial asset held at amotised cost are assessed for specific impairment. Those found not to be specifically impaired are then collectively assessed for any impairment that has been incurred but not yet identified. Financial asset held at amotised cost that are not individually significant are collectively assessed for impairment by grouping together financial asset held at amotised cost with similar risk characteristics.

In assessing collective impairment the Branches use the higher of 1.5% of risk weighted asset computed as per Central Bank of UAE guidelines and a statistical modelling which incorporates historical trends of the probability of default, timing of recoveries and the amount of loss incurred, adjusted for management's judgement as to whether current economic and credit conditions are such that the actual losses are likely to be greater or less than suggested by historical modelling. Default rates, loss rates and the expected timing of future recoveries are regularly benchmarked against actual outcomes to ensure that they remain appropriate.

Impairment losses on assets measured at amortised cost are calculated as the difference between the carrying amount and the present value of estimated future cash flows discounted at the asset's original effective interest rate.

Impairment losses are recognised in statement of profit or loss and reflected in an allowance account against financial asset held at amotised cost. Interest on the impaired assets continues to be recognised through the unwinding of the discount. If an event occurring after the impairment was recognised causes the amount of impairment loss to decrease, then the decrease in impairment loss is reversed through statement of profit or loss.

Impairment losses on available-for-sale investment securities are recognised by reclassifying the losses accumulated in the fair value reserve in equity to statement of profit or loss. The cumulative loss that is reclassified from equity to statement of profit or loss is the difference between the acquisition cost, net of any principal repayment and amortisation, and the current fair value, less any impairment loss recognised previously in statement of profit or loss. Changes in impairment attributable to application of the effective interest method are reflected as a component of interest income.

If, in a subsequent period, the fair value of an impaired available-for-sale debt security increases and the increase can be related objectively to an event occurring after the impairment loss was recognised, then the impairment loss is reversed through statement of profit or loss; otherwise, any increase in fair value is recognised through other comprehensice income. Any subsequent recovery in the fair value of an impaired available-for-sale equity security is always recognised in other comprehensice income.

The Branches writes off a loan, either partially or in full, and any related allowance for impairment losses, when management determines that there is no realistic prospect of recovery.

Notes to the financial statements for the year end 31 December 2014

4 Significant accounting policies (continued)

g) Cash and cash equivalents

Cash and cash equivalents' include notes and coins on hand, unrestricted balances held with central banks and highly liquid financial assets with original maturities of three months or less from the acquisition date that are subject to an insignificant risk of changes in their fair value, and are used by the Branches in the management of their short-term commitments.

h) Loans and advances

'Loans and advances' are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and that the Branches does not intend to sell immediately or in the near term.

Loans and advances include bank balances due from head office and branches, loans and receivables and acceptances.

Loans and advances are initially measured at fair value plus incremental direct transaction costs, and subsequently measured at their amortised cost using the effective interest method.

i) Investment securities

Available-for-sale

Available-for-sale investments' are non-derivative investments that are designated as available-for-sale or are not classified as another category of financial assets. Available-for-sale investments comprise debt securities. All other available-for-sale investments are measured at fair value after initial recognition.

Interest income is recognised in statement of profit or loss using the effective interest method. Dividend income is recognised in statement of profit or loss when the Branches becomes entitled to the dividend. Foreign exchange gains or losses on available-for-sale debt security investments are recognised in statement of profit or loss. Impairment losses are recognised in statement of profit or loss.

Other fair value changes, other than impairment losses, are recognised in other comprehensive income and presented in the fair value reserve within equity. When the investment is sold, the gain or loss accumulated in equity is reclassified to statement of profit or loss.

j) Property and equipment

(i) Recognition and measurement

Items of property and equipment are measured at cost less accumulated depreciation and any accumulated impairment losses.

If significant parts of an item of property or equipment have different useful lives, then they are accounted for as separate items (major components) of property and equipment.

Any gain or loss on disposal of an item of property and equipment (calculated as the difference between the net proceeds from disposal and the carrying amount of the item) is recognised within other income in statement of profit or loss.

(ii) Subsequent costs

Subsequent expenditure is capitalised only when it is probable that the future economic benefits of the expenditure will flow to the Branches. Ongoing repairs and maintenance are expensed as incurred.

(iii) Depreciation

Depreciation is calculated to write off the cost of items of property and equipment less their estimated residual values using the straight-line method over their estimated useful lives, and is generally recognised in profit or loss. Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Branches will obtain ownership by the end of the lease term. Land is not depreciated.

4 Significant accounting policies (continued)

(iii) Depreciation (continued)

The estimated useful lives of significant items of property and equipment are as follows:

Leasehold improvements
Motor vehicles
Furniture
Equipment
5 years

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

k) Impairment of non-financial assets

The carrying amounts of the Branches' non financial assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists then the asset's recoverable amount is estimated.

An impairment loss is recognised if the carrying amount of an asset exceeds its recoverable amount. Impairment losses are recognised in the statement of profit and loss.

The recoverable amount of an asset is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

Impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

Impairment losses are recognised in statement of profit or loss.

1) Provisions

A provision is recognised if, as a result of a past event, the Branches has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognised as finance cost.

m) Staff terminal benefits

The terminal benefits are provided for in accordance with the employees' contracts of employment and applicable requirements of the UAE and Oman labour laws. Entitlement to these benefits is usually based upon the employees' length of service and completion of minimum service period. The expected costs of these benefits are accrued over the period of employment.

n) Segment reporting

The Branches' segmental reporting is based on the following operating segments: Commercial banking, treasury and investments. Segment results are reported to the Chief Executive Officer of the Bank, (being the chief operating decision maker) and include items directly attributable to a segment as well as those that can be allocated on a reasonable basis.

4 Summary of significant accounting policies (continued)

o) New standards and interpretations not yet adopted

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning after 1 January 2014, and have not been applied in preparing these financial statements. Those that may be relevant to the Branches are set out below. The Branches does not plan to adopt these standards early.

- IFRS 9 Financial Instruments (2013) -IFRS 9 is effective for annual reporting periods beginning on or after 1 January 2018, with early adoption permitted.
- IFRS 15 Revenue from Contracts with Customers-IFRS 15 is effective for annual reporting periods beginning on or after 1 January 2017, with early adoption permitted.

The following new or amended standards are not expected to have a significant impact of the Branches' consolidated financial statements.

- Defined Benefit Plans: Employee Contributions (Amendments to IAS 19).
- Annual Improvements to IFRSs 2010-2012 Cycle.
- Annual Improvements to IFRSs 2011-2013 Cycle.

Notes to the financial statements for the year end 31 December 2014

5 Financial risk management

a) Introduction and overview

The Branches have exposure to the following risks from its use of financial instruments:

- · credit risk;
- · liquidity risk;
- · market risks; and
- operational risks

This note presents information about the Branches' exposure to each of the above risks, the Branches' objectives, risk management frameworks, policies and processes for measuring and managing risk, and the Branches' management of capital.

Risk management framework

The overall responsibility for risk management in the Branches is vested with the Board of Directors of the Bank. The Board authorises appropriate credit, liquidity and market risk policies as well as suitable operational guidelines based on the recommendation of management. Approval authorities are delegated to different functionaries, including the UAE Country Manager, in the hierarchy depending on the amount, type of risk and collateral security. The Bank has established various committees that decide on all risk issues.

b) Credit risk

Credit risk is the risk of financial loss to the Branches if a customer or counterparty to a financial instrument fails to meet its contractual obligations. The Branches seek to manage its credit risk exposure through diversification of lending activities to avoid undue concentrations of risks with individuals or groups of customers in specific locations or businesses. The Branches also monitor credit exposures and continually assesses the credit worthiness of counterparties. They also obtain security when appropriate.

The branches only invest in well reputed securities and hence credit risk is minimal.

Management of credit risk

The Board of Directors of the Bank has delegated responsibility for the oversight of credit risk to its Credit Committee. A separate Credit Department, reporting to the Credit Committee, is responsible for managing credit risk, including the following:

- Formulating credit policies in consultation with business units, covering collateral requirements, credit assessment, risk grading and reporting, documentary and legal procedures, and compliance with regulatory and statutory requirements.
- Establishing the authorisation structure for the approval and renewal of credit facilities.
- Reviewing and assessing credit risk exposures in excess of designated limits, before facilities are committed to customers by the business unit concerned. Renewals and reviews of facilities are subject to the same review process.
- Limiting concentrations of exposure to counterparties, geographies and industries (for loans and advances, financial guarantees and similar exposures), and by issuer, credit rating band, market liquidity and country (for investment securities).
- Developing and maintaining risk grading to categorise exposures according to the degree of risk of financial loss faced and to focus management on the attendant risks. The risk grading system is used in determining where impairment provisions may be required against specific credit exposures. The current risk grading framework consists of eight grades reflecting varying degrees of risk of default and the availability of collateral or other credit risk mitigation. The responsibility for setting risk grades lies with the final approving executive or committee, as appropriate. Risk grades are subject to regular reviews by Group Risk.

5 Financial risk management (continued)

Management of credit risk (continued)

- Reviewing compliance of business units with agreed exposure limits, including those for selected industries, country risk and product types. Regular reports on the credit quality of local portfolios are provided to the Credit Committee, which may require appropriate corrective action to be taken.
- Providing advice, guidance and specialist skills to business units to promote best practice throughout the Bank in the management of credit risk.

Each business unit is required to implement the credit policies and procedures, with credit approval authorities delegated from the Credit Committee. Each business unit has a Chief Credit Risk officer who reports on all credit-related matters to local management and the Credit Committee. Each business unit is responsible for the quality and performance of its credit portfolio and for monitoring and controlling all credit risks in its portfolios, including those subject to central approval.

Regular audits of business units and credit processes are undertaken by Internal Audit.

The credit quality of financial assets is managed by the Branches using internal credit ratings. The table below shows the credit quality by class of asset, based on the Branches' credit rating system. The amounts presented are gross of impairment provisions.

Notes to the financial statements for the year end 31 December 2014

5 Financial risk management (continued)

b) Credit risk (continued)

Exposure to credit risk

The Branches measure their exposure to credit risk by reference to the gross carrying affinition of financial assets less amounts offset, interest suspended and impairment losses, if any.

	Loans 2014 AED'000	and advances 2013 AED'000	Due 2014 AED 000	e from banks 2013 AED 000	Investmen 2014 AED'000	2013 AED 000

^{*} The negative carrying amount represents specific provision against unfunded exposures.

Notes to the financial statements for the year end 31 December 2014

5 Financial risk management (continued)

b) Credit risk (continued)

Impaired loans and advances

The Branches regard a loan and advance or a debt security as impaired in the following circumstances.

- There is objective evidence that a loss event has occurred since initial recognition and the loss event has an impact on future estimated cash flows from the asset.
- · A retail loan is overdue for 90 days or more.

A loan that has been renegotiated due to a deterioration in the borrower's condition is usually considered to be impaired unless there is evidence that the risk of not receiving contractual cash flows has reduced significantly and there are no other indicators of impairment.

Loans and investment debt securities that are past due but not impaired

Loans and investment debt securities that are 'past due but not impaired' are those for which contractual interest or principal payments are past due but the Branches believe that impairment is not appropriate on the basis of the level of security or collateral available and/or the stage of collection of amounts owed to the Branches.

Loans with renegotiated terms

The contractual terms of a loan may be modified for a number of reasons, including changing market conditions, customer retention and other factors not related to a current or potential credit deterioration of the customer. An existing loan may be derecognised and the renegotiated loan recognised as a new loan at fair value in accordance with the accounting policy set out in Note 4.

For the purposes of disclosures in these financial statements, 'loans with renegotiated terms' are defined as loans that have been restructured due to a deterioration in the borrower's financial position, for which the Branches has made concessions by agreeing to terms and conditions that are more favourable for the borrower than the Branches had provided initially and that it would not otherwise consider. A loan continues to be presented as part of loans with renegotiated terms until maturity, earlier repayment or until it is written off.

The Branches hold collateral against loans and advances to customers in the form of cash margins, pledges/ liens over deposits, mortgage interests over property, other registered securities over assets and guarantees. The Branches accept guarantees mainly from well reputed local or international banks/financial institutions, well established local or multinational organisations, large corporate and high net worth individuals. Estimates of fair value are based on the value of collateral assessed at the time of borrowing which are updated during annual reviews. Generally, collateral is not held over loans and advances to other banks or financial institutions, except when securities are held as a part of reverse repurchase and securities borrowing activity.

It is the Branches' policy to ensure that loans are extended to customers within their capability to service interest and repay principal instead of relying excessively on securities. Accordingly, depending on customers' credit worthiness and the type of product, facilities may be unsecured. Nevertheless, collateral is and can be an important credit risk mitigant.

An estimate of the fair value of collateral and other security enhancements held against loans and advances to customers is shown below.

2014

	2014	2013
	AED'000	AED'000
Cash	69,863	42,526
Commercial and industrial property	494,460	22,810
Residential property	30,650	5,650
Other	500	2,630
Total collateral held	595,473	73,616

Collateral values reflect the maximum exposure or the value of the collateral whichever is lower.
